**AMENDMENTS TO THE ABSTRACT**

~~The present invention relates to an~~ An electric lamp, which has a long-life focus lamp, a long-life cold cathode lamp, a long-life siren lamp and a siren for asking for help. The lamp body has an inner chamber with a focus lamp unit chamber disposed at its upper end, a cold cathode lamp unit chamber at the front end of the lamp body and a flash lamp unit chamber at the back end of the lamp body. An electric source circuit is accommodated in the inner chamber of the lamp body and the siren is operable by a hand-held rope. The characteristic of the said electric lamp is that the said light source could can illuminate continuously over two days with the power supplied by the general battery, and also does not need to replace the lamp within 100,000 hours in use, ~~which could provide to the user with a energy saving, easy to take and asking for help by the siren.~~
